

第2章

1. 选择题

(1) B (2) A (3) B (4) A (5) D (6) B (7) C

(8) A (9) B (10) D (11) C (12) D (13) D (14) A (15) C

2. (b) ElemType getMax (LinkedList L)

```
{
    pmax = L->next;
    pa = L->next->next;
    while (pa)
    {
        if (pmax->data < pa->next)
        {
            pmax = pa;
        }
        else
        {
            pa = pa->next;
        }
    }
    return pmax->data
}
```

(7) void Inverse (LinkedList, &L)

```
{ P = L->next;  
  L->next = NULL;
```

```
  while (p)
```

```
  { q = p->next;
```

```
    p->next = L->next;
```

```
    L->next = p; }
```

```
  p = q
```

```
}
```

```
}
```
